Added Flexibility Regarding Use of Your Retail versus Mail Order Pharmacy Benefits

Dear Arizona School Boards Association Insurance Trust (ASBAIT) Member,

We are happy to notify you that the intent of ASBAIT is to allow you to fill your recurrent maintenance medications at a retail pharmacy for a 30-day supply each and every month, if desired. If you choose to receive your medications in a supply greater than 30 days, then you will be required to use the mail order option. This is a change from the recent communication which said the option to fill recurrent maintenance medications at a retail pharmacy was no longer going to be available as of July 1, 2015.

Helpful Tips Regarding Your Prescription Medications

If your ASBAIT plan offers prescriptions at a copay:

- You may fill any covered prescription in a 30-day supply at a retail pharmacy, paying the appropriate 30-day copay with every refill
- 90-day supply prescriptions with a lower copay are only available through the mail order option
- Your plan offers an incentive to use mail order on your 90-day supply maintenance medications which is equivalent to two 30-day copays for a three month supply. That saves you one 30-day copay every 90 days when you use mail order.

If you are on a High Deductible Health Plan (HDHP)

- Your prescriptions are subject to your medical deductible and co-insurance.
- You may fill 30-day supply prescriptions at the retail pharmacy
- 90-day supply prescriptions are only available through the mail order option
- Once your deductible is met, the plan will pay 80% of eligible prescriptions

Reminder:

Your prescriptions copays, deductible, co-insurance etc. now apply to your plan annual maximum out of pocket as mandated by the Affordable Care Act.
